

Multiple Lifeguards EAP

On Duty lifeguard identifies a distressed, active or passive guest and initiates the EAP by giving two long whistle blasts. Lifeguard then enters water and executes the appropriate rescue.

Management of an active (responsive) guest

1. Rescuing lifeguard gives two short whistle blasts and enters the pool.
2. Designated lifeguard (lifeguard to the left) on duty provides back up coverage of the rescuing lifeguards zone until backup guard from lifeguard office takes rescuing lifeguard coverage.
3. Rescuing lifeguard completes rescue and assist the guest from the pool/attraction.
4. Rescuing lifeguard gets guest in a comfortable position. Giving blanket to keep warm and provides first aid.
5. Manager, Supervisor, or Head guard will complete a rescue report, and follow up on casual factors (e.g. an inexperienced swimmer in deep water who should be wearing a life jacket).
6. Lifeguard rotates back into rotation.

Management of an unconscious guest

1. Rescuing lifeguard gives two long whistle blasts and enters the pool.
2. Rescuing lifeguard position guest on rescue tube, and moves towards extrication point. A lifeguard call out to other guards to make sure 911 is being called and that someone is running to the fire station.
3. Upon hearing two long whistle blasts: **Office** calls 911, **Break** grabs the jump bag/oxygen/AED, and **Secondary**, Lifeguard to the left of Primary, gets backboard if needed.
4. Lifeguards that are on the pool that are not primary or secondary stay on standing until everyone is out of the pool.
5. Lifeguard with backboard and rescuing guard will prepare guest for extrication. Lifeguard with backboard will call out when to pull guest out. Once out of the water pull guest 6 ft away from the pool.
6. Rescuing lifeguard will continue the communication process. Giving out responsibilities for the AED and the rescue bag. Rescuing guard will start primary assessment then continue with needed care.
7. Continue care until EMS arrives or the guest begins breathing on their own. If breathing on their own, keep them comfortable and treat for shock. Contact Nicole Hull 801-518-0031.
8. Management, supervisor, or head guard will complete incident reports and collect witness names, addresses, phone numbers and factual witness statements.
9. Re-opening of the pool will be done on a case by case basis, under the direction of Nicole or Holly.

Management of a guest with spinal injury

1. Rescuing lifeguard gives two long whistle blasts and uses slide-in entry, calls for backboard, and yells to call 911. Rescuing guard executes spinal management skills to secure inline stabilization.
2. Upon hearing two long whistle blasts: **Office** calls 911, **Break** grabs the jump bag/oxygen/AED, and **Secondary**, Lifeguard to the left of Primary, gets backboard if needed.
3. Lifeguards that are on the pool that are not primary or secondary stay on standing until everyone is out of the pool.
4. Designated lifeguards (next to the incident) will bring backboard to the pool/attraction and work as a team to complete proper strapping and head immobilization of guest.
5. Lifeguard should perform proper and safe extrication 6 ft away from the pool.
6. Rescuing lifeguard continues the communication process and continues care until EMS takes over. Contact Nicole Hull 801-518-0031.
7. Management, supervisor, or head guard will complete incident reports and collect witness names, addresses, phone numbers and factual witness statements.
8. Re-opening of the pool will be done on a case by case basis, under the direction of Nicole or Holly.

Extra Lifeguards on Duty Responsibilities

Multiple Lifeguards EAP

On Duty lifeguard identifies a distressed, active or passive guest and initiates the EAP by giving two long whistle blasts. Lifeguard then enters water and executes the appropriate rescue.

- Crowd control- One in front of the lifeguard office, one in the front desk living room area, one up stairs/weight room/deck, and where else needed.
- Waiting for EMS in the front parking lot, also making sure no one is by the north fence/gate.
- Make sure 911 caller is informed of what is going on with the victim. Runner of communication between office and situation.
- Make sure the north gate is unlocked and a pathway is clear for EMS to come through. Get key from Head guard.
- Comfort/Care for victims family in family room.
- Ask Head Guard for any other duties.

Whistles Protocol

One Short Blast- Get Guest's Attention

Two Shorts Blasts- Get lifeguard's/ Head guard's attention & Water Saves

One Long Blast- Opening and Closure of Pool

Two Long Blast- Indicate Major Emergency
